# GETTING IN

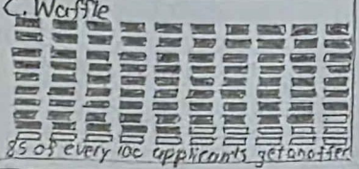

How Australia decides who gets a university place — and what that means from Malaysia

318,629 Applicants | 270,719 offers | 85% offer rate

Applications & offers for undergraduate places, 2010–2025

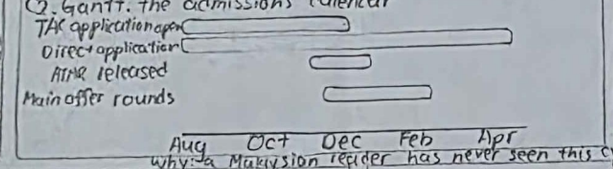

## 1. The front door is wider than you think

C1. Waffle

85 of every 100 applicants get an offer

C2. Gantt: the admissions calendar

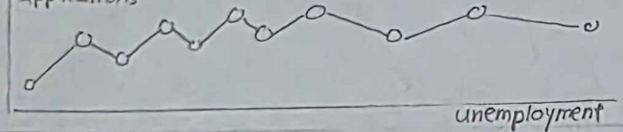

why a Malaysian reader has never seen this cycle

TEXT · What is an ATAR?

ATAR is a RANK, not a score.
99.95 = top of the state.
Explain it here, before any chart uses the words.

4 short lines + 4 simple icons.

C3 · connected scatterplot

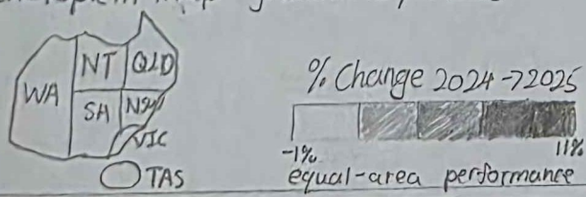

TEXT · the story spine

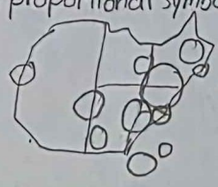

Demand follows the economy: when jobs get scarce, applications rise. 2025 saw a 5.4% rebound in applications. State the claim here in two sentences. then let sections 2–5 test it. Annotate COVID + 2025 on C3.

## 2. Where you apply matters

C4. choropleth map · growth by state

C5. proportional symbol map? · universities

Tooltip: name, applications, offer rate.

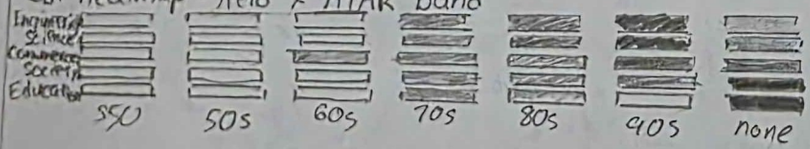

size = applications

colour = % change

C7. bump chart · field of education rank

C8. heatmap · field × ATAR band

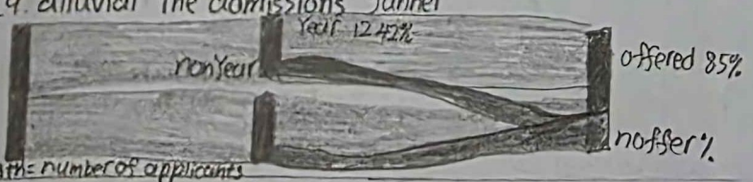

TEXT · the 60% headline

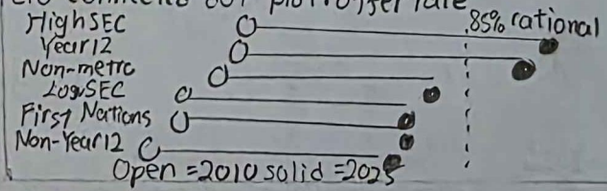

60% of offers went to people with no ATAR, or who were not in Year 12. The rank matters less than everyone assumes. Set this as a pull-quote

## 4. ATAR is not the only way in

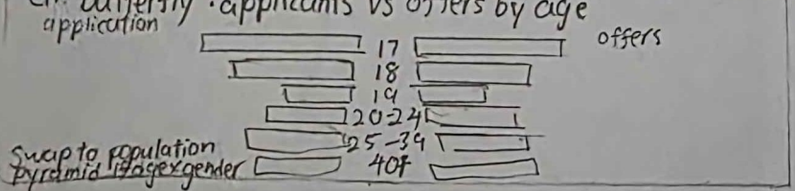

C9. alluvial the admissions funnel

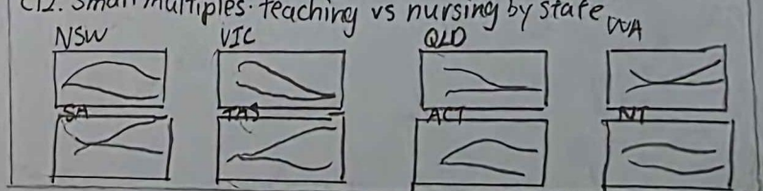

C10 connected dot plot · offer rate

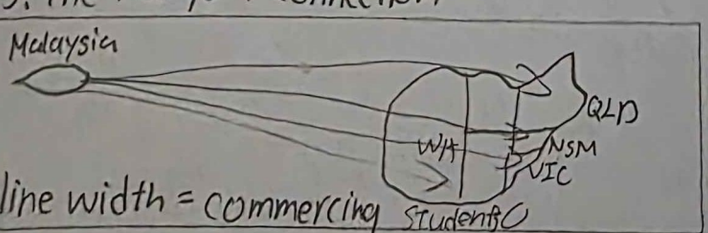

C11. butterfly · applicants vs offers by age

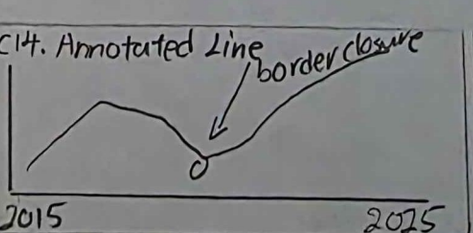

C12. small multiples · teaching vs nursing by state

## 5. The Malaysia connection

C14. Annotated line

TEXT · so what?

Three takeaways for a Malaysian reader

1. rank ≠ score
2. pathway matters more than ATAR
3. where you apply changes
